

## Amendments to the Claims

Please amend the Claims as follows:

1. (currently amended) A method comprising:

performing a registration process with a directory device, said registration process comprises a first client device specifying media content to download;

said directory device supplying to said first client device a list of media list of active media suppliers for providing said media content after said specifying;

said directory device coupling said first client device to a media supplier chosen from said list of active media suppliers;

~~downloading said media content in an encrypted format from said media supplier~~  
software operating on said media supplier encrypting and transmitting said media content to said first client device after said coupling said first client device to said media supplier, said software regulates distribution of said media content;

~~downloading said software transmitting~~ to said first client device an encryption key capable of decrypting said media content;

said software transmitting a copy of said software to said first client device;

~~downloading said media content from said first client device~~ said copy of said software operating on said first client device encrypting and transmitting said media content to a second client device; and

~~downloading said copy of said software transmitting~~ to said second client device said encryption key.

2. (previously presented) The method as described in Claim 1 further comprising:

coupling said second client device to said directory device.

3. (previously presented) The method as described in Claim 1 further comprising:

coupling said second client device to said first client device.

4. (currently amended) The method as described in Claim 1 ~~wherein said first client device receives said encryption key from said media supplier~~ further comprising:

said copy of said software transmitting a copy of said copy of said software to said second client device.

5. (currently amended) The method as described in Claim 1 wherein said ~~first client device receives said encryption key from said directory device~~ copy of said software does not allow said media content to be downloaded without a client device interacting with its interface.

6. (currently amended) The method as described in Claim 1 wherein said ~~second client device receives said encryption key from said first client device~~ copy of said software does not allow said media content to be downloaded by said second

client device without said second client device first communicating with said directory device.

7. (currently amended) The method as described in Claim 1 ~~wherein said second client device receives said encryption key from said directory device~~ further comprising:

said directory device creating said list of said active media suppliers.

8. (previously presented) The method as described in Claim 1 wherein said encrypted media content is video, audio, graphics, software, or information.

9. (previously presented) The method as described in Claim 1 wherein said media supplier comprises a computer.

10. (previously presented) The method as described in Claim 1 wherein said media supplier comprises a third client device.

11. (previously presented) The method as described in Claim 1 wherein said first client device is a computer, set-top-box, or digital recording/play back device.

12. (currently amended) The method as described in Claim 1 further comprising:

supplying to said second client device a second list ~~of media~~ of active media suppliers for providing said media content.

13. (currently amended) A method comprising:

coupling said first client device to a directory device and specifying media content to download;

said directory device supplying to said first client device a list of media suppliers for providing said media content after said specifying;

~~downloading to said first client device said media content in an encrypted format from a media supplier chosen from said list~~ software operating on a media supplier chosen from said list encrypting and transmitting said media content to said first client device, said software controls distribution of said media content;

said software transmitting a copy of said software to said first client device;

downloading to said first client device an encryption key capable of decrypting said media content;

~~downloading said media content from said first client device~~ said copy of said software operating on said first client device encrypting and transmitting said media content to a second client device; and

downloading to said second client device said encryption key.

14. (previously presented) The method as described in Claim 13 further comprising:

coupling said second client device to said directory device.

15. (previously presented) The method as described in Claim 13 further comprising:

coupling said second client device to said first client device.

16. (previously presented) The method as described in Claim 13 wherein said first client device receives said first encryption key from said media supplier.

17. (previously presented) The method as described in Claim 13 wherein said first client device receives said first encryption key from said directory device.

18. (previously presented) The method as described in Claim 13 wherein said second client device receives said second encryption key from said first client device.

19. (previously presented) The method as described in Claim 13 wherein said second client device receives said second encryption key from said directory device.

20. (previously presented) The method as described in Claim 13 wherein said encrypted media content is video, audio, graphics, software, or information.

21. (previously presented) The method as described in Claim 13 wherein said media supplier comprises a third client device.

22. (previously presented) The method as described in Claim 13 wherein said first client device is a computer, set-top-box, or digital recording/play back device.

23. (previously presented) The method as described in Claim 13 further comprising:

supplying to said second client device a second list of media suppliers for providing said media content, wherein said second list of media suppliers comprises said first client device.

24. (currently amended) A system comprising:

a media supplier ~~for transmitting media content that is encrypted upon which~~ software operates for encrypting and transmitting media content and for transmitting a copy of said software, said software regulates distribution of said media content;

a first client device coupled to said media supplier and for receiving said media content from said media supplier and for receiving said copy of said software, said first client device for receiving a first encryption key for decrypting said media content;

a directory device for coupling said first client device to said media supplier, and for supplying to said first client device a list of media of active media suppliers that

comprises said media supplier after said first client device specifies said media content to download; and

a second client device coupled to said first client device and for receiving said media content from said first client device, said second client device for receiving a second encryption key for decrypting said media content.

25. (previously presented) The system of Claim 24 wherein said media content that is encrypted is video, audio, graphics, software, or information.

26. (previously presented) The system of Claim 24 wherein said first client device is a computer, set-top-box, or digital recording/play back device.

27. (previously presented) The system of Claim 24 wherein said second client device is a computer, set-top-box, or digital recording/play back device.

28. (previously presented) The system of Claim 24 wherein said first client device receives said first encryption key from said media supplier.

29. (previously presented) The system of Claim 24 wherein said first client device receives said first encryption key from said directory device.

30. (previously presented) The system of Claim 24 wherein said second client device receives said second encryption key from said first client device.

31. (previously presented) The system of Claim 24 wherein said second client device receives said second encryption key from said directory device.

32. (previously presented) The system of Claim 24 wherein said media supplier comprises a third client device.

33. (previously presented) The system of Claim 24 wherein said directory device for coupling said second client device to said first client device.
